ASC/3 Head Control Canadian Ghost Phase

The left turn ghost phase on turns the through permissive pedestrian clear output “on” when the left turn green or yellow is “on”.
This programming example is for a Standard Quad but can be modified for other phasing.

MM-1-8-1: Disable (“D”) LP steps N, M, O & P

MM-1-8-2 Program LP steps N, M, O & P as follows:

LP N

IF GREEN ON PHASE 1 IS ON
OR YELLOW ON PHASE 1 IS ON

THEN SET PED CLEAR 2 ON

ELSE SET PED CLEAR 2 OFF

LP M

IF GREEN ON PHASE 5 IS ON
OR YELLOW ON PHASE 5 IS ON

THEN SET PED CLEAR 6 ON

ELSE SET PED CLEAR 6 OFF

IF GREEN ON PHASE 3 IS ON
OR YELLOW ON PHASE 3 IS ON

THEN SET PED CLEAR 8 ON

ELSE SET PED CLEAR 8 OFF

IF GREEN ON PHASE 7 IS ON
OR YELLOW ON PHASE 7 IS ON

THEN SET PED CLEAR 4 ON

ELSE SET PED CLEAR 4 OFF

MM-1-8-1: Enable (“E”) LP steps N, M, O & P

Note: N, M, O, P stands for four different LP steps
