Permissive LT Red Flash Head Control

Flash the Left Turn when the permissive phase is green.

This programming example is for a Standard Quad and a flash rate of 1 PPS but can be modified for other phasing configurations and flash rates.

MM-1-8-1: Disable ("D") LP steps 1,2,3 & 4

MM-1-8-2 Program LP steps 1-4 as follows:

LP 1

IF COB CODE ON 546
AND GREEN ON PHASE 6 IS ON

THEN SET PHASE RED 1 OFF

LP 2

IF COB CODE ON 546
AND GREEN ON PHASE 2 IS ON

THEN SET PHASE RED 5 OFF

LP 3

IF COB CODE ON 546
AND GREEN ON PHASE 4 IS ON

THEN SET PHASE RED 7 OFF

LP 4

IF COB CODE ON 546
AND GREEN ON PHASE 8 IS ON

THEN SET PHASE RED 2 OFF

MM-1-8-1: Enable ("E") LP steps 1,2,3 & 4

Note: 546 is 1PPS
547 is 2.5 PPS
548 is 5 PPS
