The RocketLinx ES8108-XT is Comtrol's 8-port Fast Ethernet industrial switch featuring a 2.0Gbps Packet Switch engine with packet forwarding and filtering mechanisms to meet industrial communications standards. It provides packet forwarding capabilities to handle 64 to 1522 byte long packet sizes in two priority queues to optimize data forwarding performance. Broadcast storm filtering and flow control functions ensure data delivery free of traffic congestion.

For installation in harsh or industrial environments requiring CID2 certification, the ES8108-XT is equipped with two redundant power inputs, features a rugged IP31 grade housing, and operates within a broad -40° to 75°C temperature range. For ease-of-maintenance, the ES8108-XT has alarm output relays for port link and power events to assist engineers with on-site monitoring.
