ZincBlue2 Battery

ZincBlue2: The Safer, Smarter, Greener UPS

ZincBlue2 is the next-generation intelligent nickel-zinc battery-based uninterruptable power supply (UPS) solution. The ZincBlue2 nickel-zinc battery panel and battery module feature a more compact and lightweight nickel-zinc battery design. The built-in intelligent digital charge and discharge control, along with the updated connectors, make for a very simple-to-connect, no-maintenance system with a unique hot-swappable battery replacement capability.

The Benefits to Agencies?

ZincBlue2's compact design leverages more of the unused space in a traffic cabinet. The unique battery panels can fit in normally unused space on the sides of 33x-type cabinets. The design allows for multiple slide-in installations, requiring no additional mounting, while the shelf/rackmount battery module design has a lower profile to allow more batteries to be stacked. The nickel-zinc battery technology is free from hazardous materials, requires no maintenance, is half the weight of lead acid

ECONOLITE

batteries, and is fully recyclable, giving agencies peace of mind regarding the system's safety, longevity, and reliability. ZincBlue2 is fully UL-certified to ensure compatibility with most agency requirements. As such, ZincBlue2 fully supports an agency's green and Smart City initiatives.

The Benefits to the Driving Public

Uninterruptable power systems help ensure signalized intersections continue to function during a utility power disruption. ZincBlue2 ensures safety for the driving public and emergency responders, even during the hazardous conditions of power outages. ZincBlue2 provides an environmentally-conscious alternative to traditional lead-acid Battery Backup System (BBS), for a more sustainable solution.

Why ZincBlue2?

Nickel-Zinc Battery Chemistry

- Half the size and weight of lead-acid batteries
- Self-maintaining; no periodic maintenance
- Faster recharge time than lead-acid batteries
- Longer storage and operational life than lead-acid batteries
- No hazardous materials; no sulfation
- Recyclable and environmentally friendly

Compact Form Factors

- Ingenious flexible battery design inserts in dead space between rack and cabinet wall
- Shelf mount & rack mount
- Quick connect/disconnect battery string and AC cables

Innovative Electronics Design

- Built-in chargers and controllers
- Integrated temperature compensated charging
- Digital battery bus for intelligent battery management
- Parallel battery strings; Redundant performance

Output	
Power Output	500W Battery Panel: 500 Watts
	500W Battery Module: 500 Watts
Voltage Output	48VDC Nominal with Redundancy
Battery Type & Panel Design	
Chemistry	Nickel-Zinc, Sealed
Electrolyte	Starved, KOH, Aqueous
Configuration	Divital Rattery Rus
	Compartmentalized Battery Strings
	Comparitmentation destroy of things Managed in Parallel Upon Discharge
	Integrated Socialed Dates y Surges Managed in France Open Discharge
	Redundant Parformance
Pattory Communications	Neddituality enformance
Maximum Battery Configuration	6 Danals or Modulas
Cold Stort	or aness or modules
Mechanical	simple push-button activation of cold start on battery power
Weenamear	500W Battany Panal- 1 1"H V 19 0"W V 24 4"D
Size	Solow Battany Module : 2 2"H V 17 0"H V 12 1"D
	Solve Battery Jonal: 77 Siles
Weight	Soow Battary Modula: 25 Olbe
	Single Ouriek Connect/Disconnect 7W2 Deub Connector
Battery Connection System	Jingle Quick Connector for AC Power
	Rattery Panels - Elevible Rattery Panel Inserted in Dead Space Between Rack and Cabinet Wall
Form Factors and Mounting	Battery Module - Shelf Mount Back Mount
